

Please install Multipass to practice during the class: <https://canonical.com/multipass/install>

It supports Linux, Windows, MacOS

1. Install
2. Launch an instance
3. Running a container with the Docker blueprint in Multipass:
<https://ubuntu.com/tutorials/running-a-container-with-the-docker-workflow-in-multipass>

Please contact: ntquan@fit.hcmus.edu.vn in case you have any issues when installing and running the software
