C# Call REST API

Making the request

```
using var client = new HttpClient();
client.BaseAddress = new Uri(url);
client.DefaultRequestHeaders.Accept.Add(
    new MediaTypeWithQualityHeaderValue("application/json"));

// JWT
```

Handling response

```csharp
var response = client.GetAsync(urlParameters).Result;
if (response.IsSuccessStatusCode)   {
    var items = response.Content
            .ReadAsAsync<IEnumerable<DataObject>>().Result;
    foreach (var d in items) {
      Console.WriteLine("{0}", d.Name);
    }
} else {
    Console.WriteLine("{0} ({1})",
        (int)response.StatusCode,
        response.ReasonPhrase);
}
```
